

OPTICA ACTA

130

The International Journal of Applied and Theoretical Optics

Volume 19

Printed and Published by

TAYLOR & FRANCIS LTD

10-14 MACKLIN STREET LONDON WC2B 5NF

Founded under the auspices of the International Commission for Optics

CONTENTS OF VOLUME 19

No. 1 January 1972

| | Page |
|---|------|
| Turning value monitoring of narrow-band all-dielectric thin-film optical filters. H. A. MACLEOD | 1 |
| Aufbauprinzipien optischer Zusatzsysteme in Spektralphotometern. CLAUS FREITAG | 29 |
| A new method for linear recording in holography. C. S. VIKRAM and R. S. SIROHI | 39 |
| Moden des Fabry-Perot-Resonators mit ebenen parallelen Spiegeln. I. Ansatz und Bestimmungsgleichung. G. SIMONSOHN | 45 |
| Moden des Fabry-Perot-Resonators mit ebenen parallelen Spiegeln. II. Lösungen und Diskussion. G. SIMONSOHN | 59 |
| Research note: A comment on the wave aberration formula of H. H. Hopkins, BERGE TATIAN | 79 |

No. 2 February 1972

| | |
|--|-----|
| Some effects of spatial and temporal coherence on in-line Fraunhofer holography. HIROFUMI FUJIWARA and KAZUMI MURATA | 85 |
| A pupil-scan aberration analyser. T. L. WILLIAMS | 105 |
| Eine neue Metrik für das automatische Korrigieren. H. BRUNNER | 121 |
| Dark-field (diffrimoscopic) images of periodic objects (coherent illumination). S. V. GUPTA and D. SEN | 125 |
| Dark-field (diffrimoscopic) images of periodic objects (partially coherent illumination). S. V. GUPTA and D. SEN | 137 |
| The statistics of optical intensity fluctuations. DON J. TORRIERI | 155 |
| Conference Notice | 159 |
| Notice | 161 |
| Book reviews | 163 |

No. 3 March 1972

| | |
|--|-----|
| Imaging and magnification properties in holography. J. F. MILES | 165 |
| Phénomènes de diffraction à trois dimensions. ALAIN LIFCHITZ et MARIE MAY | 187 |
| Optical determination of the correlation coefficient. STEN NYBERG | 195 |
| Absorption des halogénures de calcium dans l'ultraviolet extrême. A. LE COMTE et MME S. ROBIN | 203 |
| Calcul des constantes optiques à partir des spectres de réflexion. RAYMOND VIERNE | 209 |
| Méthode de calcul d'objets correspondant à une image diffractionnelle Donnée. G. BOYER et B. LAMOUROUX | 223 |
| Basis functions of tristimulus coordinate spaces. WILLIAM A. SHAPIRO | 235 |

| | Page |
|---|------|
| Correspondence : | |
| Eine inkohärente Methode aktiver optischer Übertragung. K.-E. ELßNER und G. SCHULZ | 243 |
| Conference Notice | 247 |
| Book reviews | 249 |

No. 4 April 1972

| | |
|--|-----|
| Displacement measurement from double-exposure laser photographs. E. ARCHBOLD and A. E. ENNOS | 253 |
| Measurement of spatial coherence using speckle patterns. TOSHIMITSU ASAKURA, HITOSHI FUJII and KAZUMI MURATA | 273 |
| Holographic imaging of a point object in higher diffraction orders. ROMUALD PAWLUCZYK | 291 |
| Two-point resolution in partially coherent light. I. Ordinary microscopy, disc source. M. DE and A. BASURAY | 307 |
| Pockels' effect in α -quartz. K. VEERABHADRA RAO and T. S. NARASIMHAMURTY | 319 |
| Focused irradiance fluctuations beyond a layer of turbulent atmosphere. K. S. GOCHELASHVILY and V. I. SHISHOV | 327 |
| Addendum: | |

| | |
|--|-----|
| Konstruktionsdaten von lichtstarken katadioptrischen Objektiven nach Čanžek (1971). L. ČANŽEK | 333 |
|--|-----|

No. 5 May 1972

| | |
|---|-----|
| Editorial | 337 |
| Financial Contributors | 338 |
| Geleitworte. HERBERT SCHOBER | 339 |
| Viewing stereoscopically through binocular optical systems. C. H. BEDWELL | 341 |
| Optimum diopter value for a view-finder of photographic camera. HITOSHI OHZU and TADASHI SHIMOJIMA | 343 |
| Optische Modulation durch isolierte Netzhäute. HITOSHI OHZU und JAY M. ENOCH | 347 |
| Kontinuierliche objektive Messung der Akkomodation des menschlichen Auges. H. KRUEGER | 351 |
| The use of high refractive index glasses of low dispersion for the correction of medium and high ametropia. ALDO DE COLA | 355 |
| Age dependence of changes in pupil diameter in the dark. F. S. SAID and W. S. SAWIRES | 359 |
| Suprathreshold contrast perception and its electrophysiological correlate. A. FIORENTINI and L. MAFFEI | 363 |
| A model of threshold detection for photopic vision. E. P. LAVIN and I. OVERINGTON | 365 |

| | Page |
|---|------|
| Binoptic summation of liminal stimulation. GILLRAY L. KANDEL | 369 |
| Zur Unterschieds-Empfindlichkeit und Schwarz-Leuchtdichte im mesopischen Bereich. S. KOKOSCHKA | 373 |
| Über die Farbenplastik. S. RÖSCH | 379 |
| Etude des propriétés diffusantes de la rétine : application au système optique de l'oeil. F. BERNY | 381 |
| Visual acuity using binoculars. F. H. C. MARRIOTT | 385 |
| Wide-angle optical model of the eye. OLEG POMERANTZEFF, HAL FISH, JACQUES GOVIGNON and CHARLES L. SCHEPENS | 387 |
| The Rod-and-Frame test in perception. GLEN M. VAUGHT | 389 |
| Meteorologische Einflüsse auf die terrestrische Szintillation. D. PAPERLEIN | 391 |
| Intense spectral light effects on spectral sensitivity. H. G. SPERLING and R. S. HARWERTH | 395 |
| Transformation of arbitrary anomaloscope data to the C.I.E. system of specifications. R. LAKOWSKI and P. A. ASPINALL | 399 |
| Fixation eye movements and the processing of visual information. J. M. FINDLAY | 403 |
| A quantitative performance measure for night vision. A. VAN MEETEREN and F. W. ZONNEVELD | 409 |
| Performance of the eye-with-image intensifier. A. J. CUELENAERE and H. MULDER | 413 |
| Die optischen Parameter geriffelter Bildschirme. W. GRADZKI | 417 |
| The minimum brightness gain required in viewers using image intensifiers. D. G. TAYLOR | 421 |
| Determination of corneal configuration by the measurement of its derivatives. TOHRU FUJII, SETSURO MARUYAMA and MITSUO IKEDA | 425 |
| A new conception of the corneal topology and its application. SAMI G. EL HAGE | 431 |
| A new method for adjusting the eye in photokeratoscopy. H. PULVERMACHER and P. ROTT | 435 |
| Über den Einfluß Sphärischer Brillengläser auf die monochromatische Aberration des Auges. W. GRIMM | 439 |
| Aufschliessen des Strukturgehalts und Ermittlung des Optimalbildes von Fokussereien in der Licht- und Elektronenmikroskopie mit Hilfe der Fraunhoferschen Beugung (Strukturspektrographie). S. BOSECK | 445 |
| Optimal magnification in visual microscopy. GERALD WESTHEIMER | 453 |
| Analysis and synthesis of visual phenomena in microscopic vision—with particular reference to visual acuity. T. SHIMOJIMA and Y. HAYAMIZU | 455 |
| Beeinflussung bildanalytischer Messungen am Fernsehmikroskop durch subjektive Kontrasterhöhung mit Farbfiltern. M. MERTZ | 459 |
| The visibility range when observing an aircraft with and without field-glasses. H.-E. HOFFMANN | 463 |
| Relation of optical and labyrinthean orientation. GERHARD A. BRECHER, M. HERBERT BRECHER, GUNTRAM KOMMERELL, FRANZ A. SAUTER and JAN SELLERBECK | 467 |

No. 6 June 1972

| | Page |
|--|------|
| Application of the optical transfer function to visual instruments. N. P. BARTON | 473 |
| Détermination de fonctions de transfert optique par transformation de Fourier en lumière spatialement incohérente. A. LACOURT, C. FROEHLY et J. NEIRAS | 485 |
| Glare characteristics of lenses and optical instruments in the visible region. S. MARTIN | 499 |
| A modified measuring projector for the evaluation of interferograms. K. G. BIRCH | 515 |
| Two-point resolution in partially coherent light. II. Ordinary microscopy, Annular source. M. DE and A. BASURAY | 523 |
| Some properties of absorbing multilayers. A. THETFORD | 533 |
| Correspondence : | |
| Visual aberrations of large-pupil systems. G. Y. HAIG | 543 |
| The measurement of veiling glare. R. J. BREWER | 547 |
| Book reviews | 549 |

No. 7 July 1972

| | |
|--|-----|
| Professor Bedřich Havelka—an appreciation. H. H. HOPKINS | 553 |
| Projective properties of holographic imaging. M. MILER | 555 |
| A new method of alignment in space. J. HAJDA | 569 |
| Approximate formulae for mixed modulated coherent and partially polarized chaotic light. J. PEŘINA, V. PEŘINOVÁ and L. MIŠTA | 579 |
| Measurement of the modulation transfer functions of focusing screens. J. POSPÍŠIL and V. BUMBA | 593 |
| The influence of the atmosphere on the wavelength of the He-Ne laser and the solution of corrections of the laser interferometer. B. POPELA | 605 |
| On the correction of chromatic aberration. Jiří KEPRT | 613 |
| Studying hologram imagery by a ray-tracing method. I. PŘIKRYL | 623 |
| Optical system of a sensitometer with a high range of non-selective light modulation. J. EIGL and M. JAHODA | 633 |
| On some colour properties of dichroic filters. JOSEF GARAJ and JAROLÍN VANÍK | 639 |

No. 8 August 1972

| | |
|--|-----|
| The theory and measurement of the signal-to-noise ratio of second genera- tion image intensifiers. JASPER C. LUPO | 651 |
| Double-pass catadioptric systems. THOMAS H. JAMIESON | 663 |
| Resolution by Selfoc lens. A. K. GHATAK, K. SINGH, D. P. S. MALIK and M. S. SODHA | 681 |

| | Page |
|---|------|
| Diffusion multiple par un ensemble de sphères. J. DALMAS | 687 |
| Series solution for steady-state self-focusing with saturating non-linearity. A. K. GHATAK, I. C. GOYAL and M. S. SODHA | 693 |
| Propagation of radiation from a finite incoherent source in a random medium. MARK J. BERAN and ALAN M. WHITMAN | 701 |
| Correspondence : | |
| A new method for linear recording in holography retaining the recon- struction efficiency. C. S. VIKRAM and R. S. SIROHI | 709 |
| Book reviews | 713 |

No. 9 September 1972

| | |
|---|-----|
| A new total aberration formula. W. T. WELFORD | 719 |
| The effect of condenser obstruction on the two-point resolution of a microscope. T. S. MCKECHNIE | 729 |
| Interferometry with an achromatic-fringe system. S. MALICK | 739 |
| Fresnel diffraction by a circular aperture illuminated with partially coherent light. I. TOSHIMITSU ASAKURA and ISSEI AKAMATSU | 749 |
| Spectral properties of the TE_0 and TM_0 modes in dielectric thin film waveguides, excited with a prism light coupler. A. GEDEON | 765 |
| Optical transmission in polycrystals. G. S. RANGANATH and S. RAMASESHAN | 781 |
| Correspondence : | |
| Speckle patterns : a historical retrospect. P. HARIHARAN | 791 |

No. 10 October 1972

| | |
|---|-----|
| Coherent optical processing of data recorded by conventional ink-tracing. J. SHAMIR and G. WINZER | 795 |
| Fraunhofer diffraction at apertures in the form of regular polygons. I. J. KOMRSKA | 807 |
| Ellipsometric parameters of rough surfaces and of a system substrate— thin film with rough boundaries. I. OHLÍDAL and F. LUKEŠ | 817 |
| Relation of the diffuse reflectance remission function to the fundamental optical parameters. E. L. SIMMONS | 845 |
| The radiant transmittance of tandem arrays of filters. P. BAUMEISTER, R. HAHN and D. HARRISON | 853 |
| Correspondence : | |
| Hologrammes de Fourier synthétisés en lumière non mono- chromatique. F. BRIDOU et J. J. CLAIR | 865 |
| Conference Notices | 869 |
| Conference Report | 873 |

No. 11 November 1972

| | Page |
|--|------|
| A theoretical demonstration of properties of grating anomalies (S-polarization). R. C. MCPHEDRAN and M. D. WATERWORTH .. | 877 |
| Holography with light beams of finite spectral width. ADITI PAL CHAUDHURI | 893 |
| Étude des rugosités des interfaces des couches minces d'or par réflexion diffuse de rayons X sous incidence rasante. M. F. VERHAEGHE .. | 905 |
| Propagation of a gaussian beam in planar and cylindrically inhomogeneous media : comparison of modal analysis and approximate approaches. M. S. SODHA, A. K. GHATAK, D. P. TEWARI, P. K. DUBEY and A. K. AGARWAL | 941 |
| Book reviews | 951 |
| Book received | 952 |

No. 12 December 1972

| | |
|--|------|
| OTF standards for aerial mapping lenses. G. C. BROCK, A. C. MARCHANT and T. L. WILLIAMS | 953 |
| Laser recording system evaluation. DENNIS J. WOYWOOD | 973 |
| Application de la méthode des moindres carrés à la détermination des constantes optiques de substances isotropes et anisotropes uniaxes et du taux de polarisation des monochromateurs dans l'U.V. lointain. JACQUES THOMAS, JEAN-CLAUDE LEMONNIER et SIMONE ROBIN | 983 |
| The stereoscopic frame of reference in asymmetric convergence of the eyes. Response to 'point' stimulation of the retina. GEORGE AMIGO .. | 993 |
| Boundary-diffraction waves due to a general point source and their applications to aperture systems. JOHN W. Y. LIT | 1007 |
| Differential interference contrast microscope with continuously variable wavefront shear and pupilar compensation. M. PLUTA | 1015 |
| Book reviews | 1027 |
| Index of authors (with titles) | 1029 |
